CANCERCARE AI / TEST LABORATORY

Pathology - conflicting test fixture

Deliberately conflicting biomarkers for reconciliation testing

Patient: Ava Mitchell

Patient ID: DEMO-00248

DOB: 1972-04-18

Report date: 2026-10-21

SPECIMEN AND DIAGNOSIS

Cancer type: Breast cancer

Histological diagnosis: Invasive ductal carcinoma

Cancer site: Left breast

Grade: Nottingham grade 2

Tumor size: Not available in report

Clinical stage: Not available in report

BIOMARKER RESULTS

ER: Negative 0%

PR: Positive 65%

HER2: IHC 3+ / positive

Ki-67: 18%

LIMITATIONS

Biopsy findings do not establish complete clinical stage or nodal status.

No definitive resection tumor measurement is available in this report.

Pending or unperformed biomarker tests are not negative results.

This invented report exists only to test document extraction and review. It is not a signed clinical result, medical guidance, or an authorization to treat. No guideline citations are supplied.
